

SPOT THE SKIN

Made with ❤ by ROY_TO_THE_MOON

Spot the Skin is a Crypto Royale card game that is based on the 'Spot It' / 'Dobble' game.

You will find 31 cards inside that PDF with 31 unique Crypto Royale skins in total.
Each card has 6 skins and always only one skin shared between any two cards!

You can print your cards on standard paper and use double sided tape on jumbo cards or any cardboard you would like to use as a base. The black outlines and circles are used to cut the cards before and after sticking it to the cardboard - allowing for a small error while putting them together with additional margin. You can follow the instruction below.

Instructions:

1. Print all the pages.
2. Cut all the backs with text "Spot the Skin" alongside black outline.
3. Cut all the fronts with skins with margin in rectangle shapes (don't have to be precise).
4. Prepare your cardboard or jumbo playing cards and put the double sided tape on both sides.
5. Peel off the protective layer from the tape on one side of the cardboard.
6. Stick the front side of the card to the cardboard and cut it along the outer black outline.
7. Peel off the protective layer from the tape on the other side of already cut cardboard.
8. Stick the back of the card on the cardboard.
9. Turn it over and cut alongside inner black outline. Such a way that black outline will be removed - inner side of the inner black outline).
10. One card is ready! Go back to the step 5 and repeat for all the cards until there is no more remaining.
